

You are looking for possibilities for removal, marking, and drilling of glass ?  
MDI Advanced Processing GmbH offers customized solutions.

# Glass Processing by Green Laser

With glass processing systems based on the technology and the precision of Green Laser, **MDI Advanced Processing GmbH** offers new processing methods for brittle materials for a wide range of industrial applications.

Green Laser processing offers numerous advantages:

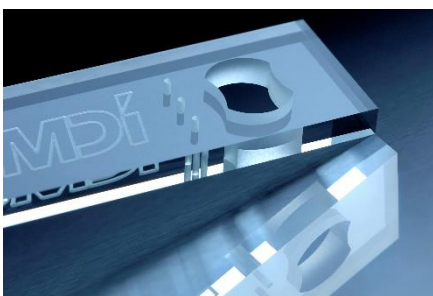

## Laser Drilling

- flexible shapes, pocket and hole drilling
- closed inside contours
- no glass thickness limitation by min. diameter
- highest precision and reproducibility
- dry and contactless procedure
- max. yield by min. waste material
- low operating costs
- no masks or other tools needed

## Additional Applications

- grooving
- marking
- coating removal

**MDI Advanced Processing GmbH** would like to inform you in detail about our products and demonstrate how incorporating Green Laser processing will benefit your company.

Please contact us if you should have any questions or if you are interested in a live demonstration of our technologies.
